**Pocket DNC**

With Pocket DNC you have the convenience of carrying around all your CNC programs in your pocket. There is no other system that gives you such flexibility at such an affordable price.

Imagine having the ability to access your CNC programs at anytime anywhere. You can load programs into a machine or download from the machine. You can even use Pocket DNC to edit your programs.

Pocket DNC comes with a number of preset machine tool setting files for the more common controls such as Fanuc, and Haas. However it is easily configurable for most CNC machine controls that have an RS232 port.

When connected to your PC any programs that are new or modified on either the PC or Pocket DNC can be synchronised. No need for you to think about which is the latest program.

**Pocket Machinist’s reference tables**

Throw away your ZEUS book because now at a touch of a button you can find out what tapping drill or clearance drill to use for Metric, BA, UNF, UNC or Whitworth threads.

Pocket DNC comes with a number of reference tables designed specifically for the CNC machinist. Additional tables will be made available and registered customers will be able to download these in the future.

- Tapping Drill Sizes
- Tapers
- Sheetmetal Thickness
- Number/Letter Drill Sizes
- Metric Threads
- FANUC ‘G’ codes for Turning
- External Turning Tool Codes
- Decimal Equivalents
- EIA/ISO Paper Tape Hole Patterns
- ASCII Character Codes

---

**Ultra rugged**

The New Generation Pocket DNC can handle the toughest workshop conditions. It meets MIL-STD-810F standards for drops, vibration and temperature extremes, and it has an IP67 rating—meaning it’s impervious to dust and water immersion.

**Pocket DNC Includes**

- The Ultra Rugged PDA
- Rs232 cable
- Pocket DNC software
- Pocket Machinist’s reference tables
- Manuals
