FeatureCAM 2015 brings a wealth of new features and functionality, with 3 and 5-axis safety and efficiency improvements, Wire EDM usability enhancements and FeatureRECOGNITION revisions to help reduce your programming times further.

New features and enhancements include:

- 3-Axis Automatic Holder Collision Checking
- Expanded Wire EDM Database
- Stock Model & Boundary Combination
- Machine Maximum Stock
- Travelling Steady Rest
- Multiple Face Feature Recognition
- 5-Axis Hole Patterns Around An Arbitrary Axis
- Addins Library

3-Axis Automatic Holder Collision Checking
Programming of complex parts is now even easier with the inclusion of Automatic Collision Checking of the tool shank and holder against the part.

Expanded Wire EDM Database
Benefit from an extended Wire EDM cutting database which is able to store a greater variety of different parameters.
Unlock the power of Delcam software

Stock Model & Boundary Combination
Combine stock models with the Part Surface Dimensions, the Stock Dimensions, Solid Models and Boundary Curves to machine parts more efficiently.

Machine Maximum Stock
Reduce the number of retraction by keeping the tool on the part to improve surface finish when used with Automatic Collision Checking.

5-Axis Hole Patterns Around An Arbitrary Axis
Benefit from a new hole pattern definition to make programming 5-axis parts even easier, allowing changes to be made to multiple holes at once, reducing programming time.

Travelling Steady Rest
Benefit from the ability to program travelling steady rests to support the workpiece, increasing the flexibility of programming very long turned parts.

Multiple Face Feature Recognition
Avoid repeatedly creating face features by selecting multiple faces or surfaces when using Interactive Feature RECOGNITION.

Addins Library
Benefit from streamlined access to the extensive library of published addins and programming examples as these are now incorporated into the distribution of the software.

FeatureCAM reduces our programming time to minutes instead of hours.
Bryan Cardon, Innovative Precision

A new version of FeatureCAM is released every 4 months.
